Morphology- and size-controlled synthesis of a metal-organic framework under ultrasound irradiation: an efficient carrier for pH responsive release of anti-cancer drugs and their applicability for adsorption of amoxicillin from aqueous solution

Reza Abazari, Ali reza Mahjoub, Alexandra M.Z. Slawin, Cameron L. Carpenter-Warren

PII: S1350-4177(17)30603-X
DOI: <https://doi.org/10.1016/j.ultsonch.2017.12.032>
Reference: ULTSON 4016

To appear in: *Ultrasonics Sonochemistry*

Received Date: 28 October 2017
Revised Date: 15 December 2017
Accepted Date: 15 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Morphology- and size-controlled synthesis of a metal-organic framework under ultrasound irradiation: an efficient carrier for pH responsive release of anti-cancer drugs and their applicability for adsorption of amoxicillin from aqueous solution
