Surpassing the current limitations of high purity H₂ production in microbial electrolysis cell (MECs): Strategies for inhibiting growth of methanogens

Abudukeremu Kadier, Mohd Sahaid Kalil, Kuppan Chandrasekhar, Gunda Mohanakrishna, Ganesh Dattatraya Saratale, Rijuta Ganesh Saratale, Gopalakrishnan Kumar, Pugazhendhi Arivalagan, Periyasamy Sivagurunathan

PII: S1567-5394(17)30232-3
DOI: doi:[10.1016/j.bioelechem.2017.09.014](https://doi.org/10.1016/j.bioelechem.2017.09.014)
Reference: BIOJEC 7059
To appear in: *Bioelectrochemistry*
Received date: 25 April 2017
Revised date: 6 September 2017
Accepted date: 29 September 2017

Please cite this article as: Abudukeremu Kadier, Mohd Sahaid Kalil, Kuppan Chandrasekhar, Gunda Mohanakrishna, Ganesh Dattatraya Saratale, Rijuta Ganesh Saratale, Gopalakrishnan Kumar, Pugazhendhi Arivalagan, Periyasamy Sivagurunathan , Surpassing the current limitations of high purity H₂ production in microbial electrolysis cell (MECs): Strategies for inhibiting growth of methanogens. The address for the corresponding author was captured as affiliation for all authors. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
