Insights into CO poisoning in high performance proton-conducting solid oxide fuel cells

Ning Yan, Xian-Zhu Fu, Karl T. Chuang, Jing-Li Luo

PII: S0378-7753(13)02048-X

DOI: [10.1016/j.jpowsour.2013.12.069](https://doi.org/10.1016/j.jpowsour.2013.12.069)

Reference: POWER 18455

To appear in: *Journal of Power Sources*

Received Date: 1 September 2013

Revised Date: 15 December 2013

Accepted Date: 16 December 2013

Please cite this article as: N. Yan, X.-Z. Fu, K.T. Chuang, J.-L. Luo, Insights into CO poisoning in high performance proton-conducting solid oxide fuel cells, *Journal of Power Sources* (2014), doi: 10.1016/j.jpowsour.2013.12.069.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- High performance anode supported PC-SOFC using BZCY electrolyte was fabricated.
- The presence of CO in fuel stream was able to deactivate Ni anode in PC-SOFC.
- Electrochemical reaction was evidenced to accelerate the poisoning process.
