Title: The influence of chemical and thermal treatments on the fluoride removal from water by three mineral structures and their characterization

Authors: N.G. Corral-Capulin, A.R. Vilchis-Nestor, E. Gutiérrez-Segura, M. Solache Ríos

PII: S0022-1139(18)30152-0
DOI: <https://doi.org/10.1016/j.jfluchem.2018.07.002>
Reference: FLUOR 9191

To appear in: *FLUOR*

Received date: 10-4-2018
Revised date: 6-7-2018
Accepted date: 6-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The influence of chemical and thermal treatments on the fluoride removal from water by three mineral structures and their characterization.

Graphical abstract

Highlights

- Natural and modified materials with Al and Fe were studied for fluoride removal
