Title: XeO₃ Adducts of Pyridine, 4-Dimethylaminopyridine, and Their Pyridinium Salts

Authors: James T. Goettel, H  l  ne P.A. Mercier, Gary J. Schrobilgen

PII: S0022-1139(18)30078-2
DOI: <https://doi.org/10.1016/j.jfluchem.2018.03.004>
Reference: FLUOR 9132

To appear in: *FLUOR*

Received date: 15-2-2018
Revised date: 6-3-2018
Accepted date: 7-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical abstract

TOC Graphic

Highlights

- The syntheses of new pyridine adducts of XeO_3 and the interactions of XeO_3 with fluoride and bifluoride in their pyridinium salts are described.
- The crystal structures show three short contacts between the xenon atom of XeO_3 and nucleophilic regions of the ligands.
