

Ternary nanocomposites of conductive polymer/functionalized GO/MOFs: synthesis, characterization and electrochemical performance as effective electrode materials in pseudocapacitors

F. Boorboor Ajdari, E. Kowsari, A. Ehsani

PII: S0022-4596(18)30227-5
DOI: <https://doi.org/10.1016/j.jssc.2018.05.038>
Reference: YJSSC20244

To appear in: *Journal of Solid State Chemistry*

Received date: 17 February 2018
Revised date: 4 May 2018
Accepted date: 28 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
