Synthesis of six 8-quinolate-based ruthenium complexes with high catalytic activity for nitroarene reduction

Wei-Guo Jia, Ming-Xia Cheng, Qiu-Tong Xu, Li-Li Gao, Guozan Yuan

PII: S0277-5387(18)30385-1
DOI: <https://doi.org/10.1016/j.poly.2018.06.054>
Reference: POLY 13263

To appear in: *Polyhedron*

Received Date: 8 March 2018
Revised Date: 27 June 2018
Accepted Date: 27 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Synthesis of six 8-quinolate-based ruthenium complexes
with high catalytic activity for nitroarene reduction**
