Exploration of high-performance W_6S_8 -supported single-atom Rh_1 catalysts for reverse water-gas shift reaction and methanol formation via DFT computational study

Qian Zhang, Ling Guo, Zijun Hao

PII: S0277-5387(18)30055-X

DOI: <https://doi.org/10.1016/j.poly.2018.01.025>

Reference: POLY 13023

To appear in: *Polyhedron*

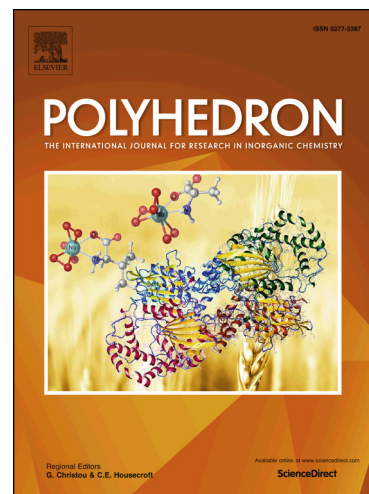

Received Date: 27 November 2017

Revised Date: 20 January 2018

Accepted Date: 22 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Exploration of high-performance W₆S₈-supported single-atom Rh₁**
2 **catalysts for reverse water-gas shift reaction and methanol formation**
3 **via DFT computational study**
