Title: Sonication-assisted surface modification method to expedite the water removal from cellulose nanofibers for use in nanopapers and paper making

Authors: Jatin Sethi, Kristiina Oksman, Mirja Illikainen, Juho Antti Sirviö

PII: S0144-8617(18)30626-X
DOI: <https://doi.org/10.1016/j.carbpol.2018.05.072>
Reference: CARP 13654

To appear in:

Received date: 16-3-2018
Revised date: 14-5-2018
Accepted date: 25-5-2018

Please cite this article as: Sethi, Jatin., Oksman, Kristiina., Illikainen, Mirja., & Sirviö, Juho Antti., Sonication-assisted surface modification method to expedite the water removal from cellulose nanofibers for use in nanopapers and paper making. *Carbohydrate Polymers* (2018), <https://doi.org/10.1016/j.carbpol.2018.05.072>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Sonication-assisted surface modification method to expedite the water removal from cellulose nanofibers for use in nanopapers and paper making
