

## Accepted Manuscript

Title: Molecular weight impact on the mechanical forces between hyaluronan and its receptor

Authors: Lei Jiang, Guihua Liu, Hanyun Liu, Juan Han, Zhibin Liu, Hongchao Ma

PII: S0144-8617(18)30669-6  
DOI: <https://doi.org/10.1016/j.carbpol.2018.06.015>  
Reference: CARP 13689

To appear in:

Received date: 11-12-2017  
Revised date: 4-6-2018  
Accepted date: 4-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Molecular weight impact on the mechanical forces between hyaluronan and its receptor

## Highlights

- Lateral and normal forces were measured between hyaluronan (HA) and receptor CD44.
- HA-CD44 binding depends on HA molecular weight (MW).
- Impact of HA multivalency is more than the sum of separate monovalent bindings.
