

Accepted Manuscript

Title: Enzymatic Biopolishing of Cotton Fabric with Free/Immobilized Cellulase

Authors: Nisha Sankarraj, Gobi Nallathambi

PII: S0144-8617(18)30225-X
DOI: <https://doi.org/10.1016/j.carbpol.2018.02.067>
Reference: CARP 13329

To appear in:

Received date: 17-11-2017
Revised date: 21-2-2018
Accepted date: 22-2-2018

Please cite this article as: Sankarraj, Nisha., & Nallathambi, Gobi., Enzymatic Biopolishing of Cotton Fabric with Free/Immobilized Cellulase. *Carbohydrate Polymers* <https://doi.org/10.1016/j.carbpol.2018.02.067>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enzymatic Biopolishing of Cotton Fabric with Free/Immobilized Cellulase

HIGHLIGHTS

- The biopolishing of cotton fabric is obtained by the treatment of the immobilized cellulase.
- The immobilized cellulase treatment of the fabrics showed lower weight loss.
- The immobilized cellulase treatment of the fabrics showed higher tensile strength
