Title: Antifouling zwitterionic dextran micelles for efficient loading DOX

Authors: Xiaotian Wu, Xiaofeng Chen, Peibo Hu, Minghong Hou, Yahao Dong, Yuping Wei

PII: S0144-8617(18)30276-5
DOI: <https://doi.org/10.1016/j.carbpol.2018.03.020>
Reference: CARP 13370

To appear in:

Received date: 11-11-2017
Revised date: 1-3-2018
Accepted date: 11-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Antifouling zwitterionic dextran micelles for efficient loading DOX

Highlights:

- CB-dextran has better antifouling properties than natural dextran.
- DOX/CB-Dex-PCL micelles were effective in the uptake of the target tumor cells.
- CB-Dex-PCL micelles are potentially excellent drug carriers.
