

Accepted Manuscript

Title: Synthesis of hyaluronan-amikacin conjugate and its bactericidal activity against intracellular bacteria *in vitro* and *in vivo*

Authors: Zhaojie Wang, Yuanhao Qiu, Chunyan Hou, Dongdong Wang, Feifei Sun, Xiaojun Li, Feng Wang, Hong Yi, Haibo Mu, Jinyou Duan

PII: S0144-8617(17)31217-1
DOI: <https://doi.org/10.1016/j.carbpol.2017.10.061>
Reference: CARP 12910

To appear in:

Received date: 11-8-2017
Revised date: 5-10-2017
Accepted date: 17-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript: CARBPOL-D-17-02734

Title

Synthesis of hyaluronan-amikacin conjugate and its bactericidal activity against intracellular bacteria *in vitro* and *in vivo*

Zhaojie Wang, Yuanhao Qiu, Chunyan Hou, Dongdong Wang, Feifei Sun, Xiaojun Li, Feng Wang, Hong Yi, Haibo Mu* and Jinyou Duan*

Highlights

- HA-AM was obtained through reaction of HA with amikacin via “click” chemistry.
- HA-AM was more effective against intracellular bacteria than amikacin did.
- HA-AM had undetectable cytotoxicity.
