

## Accepted Manuscript

Title: Crystallization, structural relaxation and thermal degradation in Poly(L-lactide)/cellulose nanocrystal renewable nanocomposites

Author: E. Lizundia J.L. Vilas L.M. León

PII: S0144-8617(15)00085-5  
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2015.01.054>  
Reference: CARP 9642

To appear in:

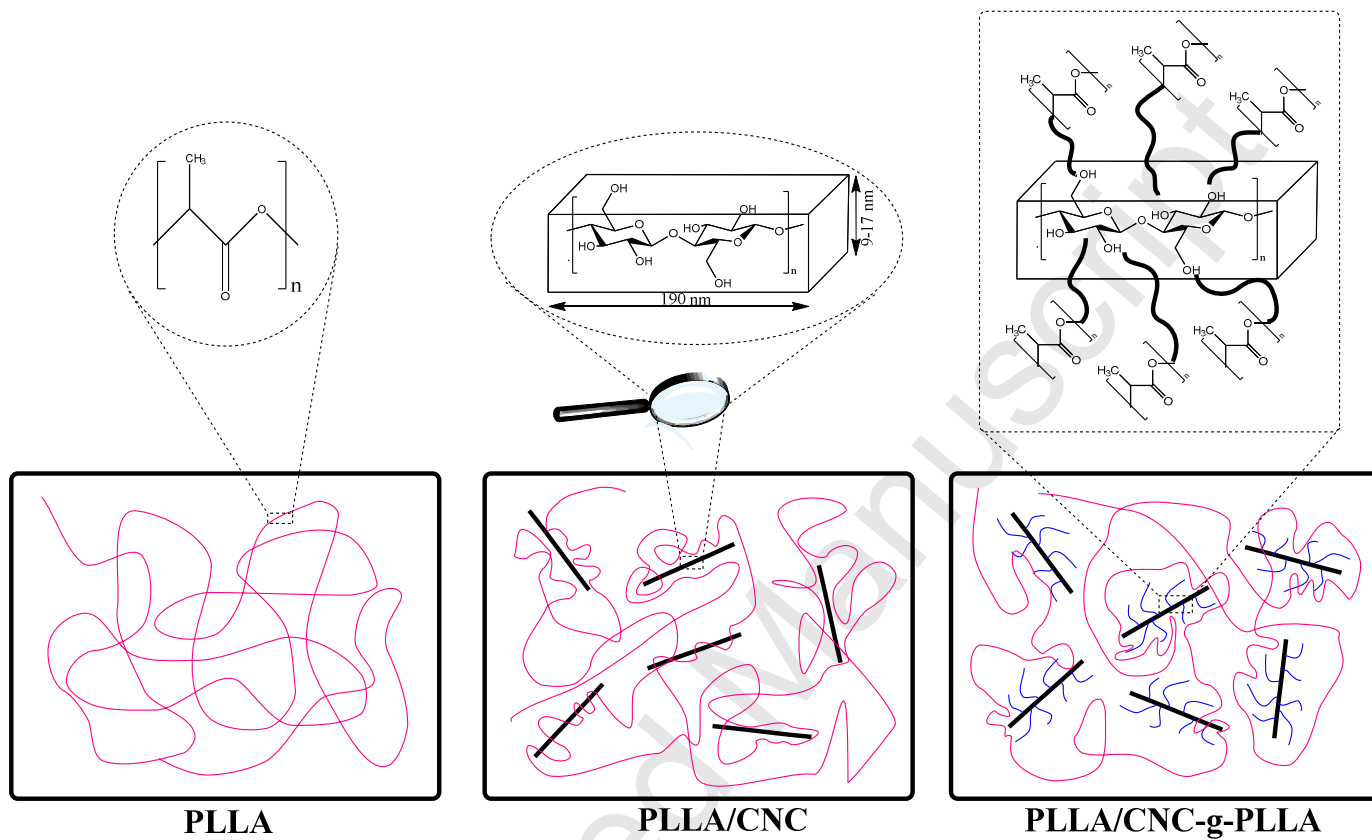

Received date: 7-10-2014  
Revised date: 12-1-2015  
Accepted date: 15-1-2015

Please cite this article as: Lizundia, E., Vilas, J. L., and León, L. M., Crystallization, structural relaxation and thermal degradation in Poly(L-lactide)/cellulose nanocrystal renewable nanocomposites, *Carbohydrate Polymers* (2015), <http://dx.doi.org/10.1016/j.carbpol.2015.01.054>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Graphical abstract

A proposed model for the structural relaxation mechanism in Poly(L-lactide)/cellulose nanocrystal renewable nanocomposites.
