Title: Development and evaluation of gel-forming ocular films based on xyloglucan

Author: Hitendra S. Mahajan Sachin R. Deshmukh

PII: S0144-8617(15)00035-1

DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2015.01.018>

Reference: CARP 9606

To appear in:

Received date: 15-7-2014

Revised date: 2-1-2015

Accepted date: 7-1-2015

Please cite this article as: Mahajan, H. S., and Deshmukh, S. R., Development and evaluation of gel-forming ocular films based on xyloglucan, *Carbohydrate Polymers* (2015), <http://dx.doi.org/10.1016/j.carbpol.2015.01.018>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- 1 • Xyloglucan is biodegradable polymers used as film forming agent
- 2 • Ocular films based on xyloglucan developed using solvent casting method
- 3 • Xyloglucan films has acceptable physical properties and safety for ocular
- 4 administration
- 5 • Films exhibits sustained release of ciprofloxacin
- 6
