## **Accepted Manuscript**

The use of Brazilian propolis for discovery and development of novel antiinflammatory drugs

Marcelo Franchin, Irlan Almeida Freires, Josy Goldoni Lazarini, Bruno Dias Nani, Marcos Guilherme da Cunha, David Fernando Colon, Severino Matias de Alencar, Pedro Luiz Rosalen

PII: S0223-5234(17)30496-8

DOI: 10.1016/j.ejmech.2017.06.050

Reference: EJMECH 9545

To appear in: European Journal of Medicinal Chemistry

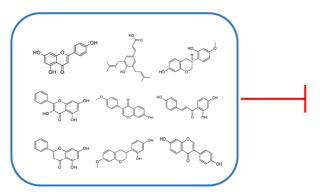

Received Date: 1 May 2017
Revised Date: 7 June 2017
Accepted Date: 23 June 2017

Rosalen, The use of Brazilian propolis for discovery and development of novel anti-inflammatory drugs, *European Journal of Medicinal Chemistry* (2017), doi: 10.1016/j.ejmech.2017.06.050.

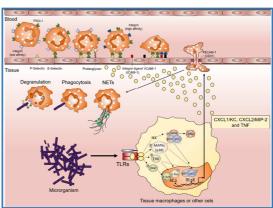

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## ACCEPTED MANUSCRIPT

Molecules isolated from Brazilian propolis with anti-inflammatory activity

Inhibition of leukocyte recruitment (chemotaxis, rolling, adhesion and transmigration)
