This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Graphical Abstract:****Small-molecule Mcl-1 Inhibitors: Emerging Anti-tumor Agents**

Yichao Wan, Ningning Dai, Zilong Tang and Hao Fang\*

The myeloid cell leukemia 1 (Mcl-1) protein has emerged as an attractive target for the development of anti-cancer therapy. This review highlights recent advances in the discovery of small-molecule Mcl-1 inhibitors from 2012 to 2017.
