New hydrazides derivatives of isoniazid against *Mycobacterium tuberculosis*: Higher potency and lower hepatocytotoxicity

Frederico Silva Castelo-Branco, Evanoel Crizanto de Lima, Jorge Luiz de Oliveira Domingos, Angelo C. Pinto, Maria Cristina S. Lourenço, Karen Machado Gomes, Mariana Marques Costa-Lima, Carlos Fernando Araujo-Lima, Claudia Alessandra Fortes Aiub, Israel Felzenszwalb, Thadeu Estevam M.M. Costa, Carmen Penido, Maria G. Henriques, Nubia Boechat

PII: S0223-5234(18)30084-9

DOI: [10.1016/j.ejmech.2018.01.071](https://doi.org/10.1016/j.ejmech.2018.01.071)

Reference: EJMECH 10148

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 25 October 2017

Revised Date: 9 January 2018

Accepted Date: 21 January 2018

Boechat, New hydrazides derivatives of isoniazid against *Mycobacterium tuberculosis*: Higher potency and lower hepatocytotoxicity, *European Journal of Medicinal Chemistry* (2018), doi: 10.1016/j.ejmech.2018.01.071.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

New Hydrazides Derivatives of Isoniazid Against *Mycobacterium tuberculosis*: Higher Potency and Lower Hepatocytotoxicity
