This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

4-Quinolone derivatives and their activities against Gram positive pathogens

Gui-Fu Zhang^a, Shu Zhang^b, Baofeng Pan^c, Xiaofeng Liu^{*,c,d}, Lian-Shun Feng^{*,e}

This review aims to outline the recent advances made towards the discovery of 4-quinolone-based derivatives as anti-Gram-positive pathogens agents and the critical aspects of design as well as the structure-activity relationship of these derivatives.
