Chalcone Scaffolds as Anti-infective Agents: Structural and Molecular Target Perspectives

Debarshi Kar Mahapatra, Dr. Sanjay Kumar Bharti, Vivek Asati

PII: S0223-5234(15)30131-8

DOI: [10.1016/j.ejmech.2015.06.052](https://doi.org/10.1016/j.ejmech.2015.06.052)

Reference: EJMECH 7979

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 17 March 2015

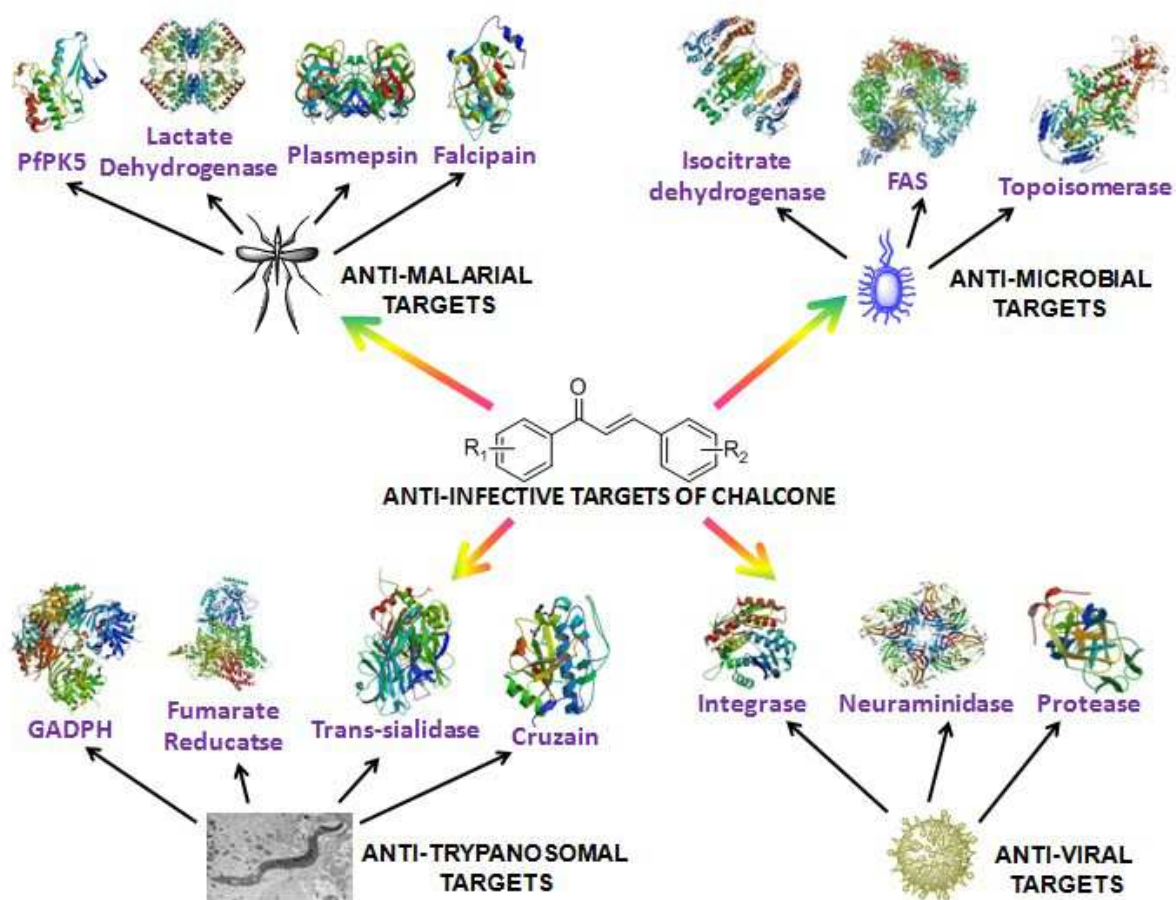

Revised Date: 27 May 2015

Accepted Date: 28 June 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## GRAPHICAL ABSTRACT

In this review, a comprehensive study of anti-infective chalcones, their molecular targets, Structure Activity Relationships (SARs) and Mechanism of Actions (MOAs) have been described.
