This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Design, synthesis and biological activity of novel asymmetric C66 analogs as anti-inflammatory agents for the treatment of acute lung injury

Pengtian Yu^{1, #}, Lili Dong^{2, #}, Yali Zhang¹, Wenbo Chen¹, Shanmei Xu¹, Zhe Wang¹, Xiaou Shan², Jianmin Zhou^{1, *}, Zhiguo Liu^{1, 3*}, Guang Liang¹

Graphical abstract:

Novel C66 analogs were synthesized and evaluated for anti-inflammatory activities in the treatment of ALI.

Keywords: Curcumin, Acute lung injury, Drug design, Chemical stability, Cytokines.
