In vitro and *in vivo* Antibacterial Evaluation and Mechanistic Study of Ornithine Based Small Cationic Lipopeptides against Antibiotic Resistant Clinical Isolates

Sandeep Lohan, Jitender Monga, Swaranjit Singh Cameotra, Gopal Singh Bisht

PII: S0223-5234(14)00558-3

DOI: [10.1016/j.ejmech.2014.06.039](https://doi.org/10.1016/j.ejmech.2014.06.039)

Reference: EJMECH 7082

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 1 May 2014

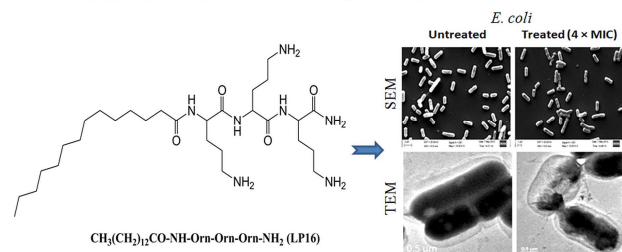

Revised Date: 16 June 2014

Accepted Date: 18 June 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Short cationic lipopeptide (LP16) with potent antibacterial activity against wide range of antibiotic resistant clinical isolates
