This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Graphical Abstract

### Synthesis of Some New Pyrazole-based 1,3-Thiazoles and 1,3,4-Thiadiazoles as Anticancer agents

Kamal M. Dawood,\* Taha M. A. Eldebss, Heba S. A. El-Zahabi, Mahmoud H. Yousef, and Peter Metz

Several 1,3-thiazole and 1,3,4-thiadiazole derivatives have been synthesized and tested for anticancer activity against three human cancer cell lines: HepG2, MCF7 and A549.
