Bioadhesive polymeric nanoparticles as strategy to improve the treatment of yeast infections in oral cavity: *in-vitro* and *ex-vivo* studies

Luís Roque, Pedro Castro, Jesus Molpeceres, Ana S. Viana, Amílcar Roberto, Cláudia Reis, Patrícia Rijo, Ingunn Tho, Bruno Sarmento, Catarina Reis

PII: S0014-3057(18)30397-5

DOI: <https://doi.org/10.1016/j.eurpolymj.2018.04.032>

Reference: EPJ 8388

To appear in: *European Polymer Journal*

Received Date: 23 February 2018

Revised Date: 18 April 2018

Accepted Date: 23 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
