Enhancing the Mechanical Properties and Self-Healing Efficiency of Hydroxyethyl Cellulose-Based Conductive Hydrogels via Supramolecular Interactions

Imtiaz Hussain, Sayed Mir Sayed, Shunli Liu, Olayinka Oderinde, Mengmeng Kang, Fang Yao, Guodong Fu

PII: S0014-3057(18)30448-8

DOI: <https://doi.org/10.1016/j.eurpolymj.2018.05.025>

Reference: EPJ 8423

To appear in: *European Polymer Journal*

Received Date: 10 March 2018

Revised Date: 9 May 2018

Accepted Date: 23 May 2018

Please cite this article as: Hussain, I., Mir Sayed, S., Liu, S., Oderinde, O., Kang, M., Yao, F., Fu, G., Enhancing the Mechanical Properties and Self-Healing Efficiency of Hydroxyethyl Cellulose-Based Conductive Hydrogels via Supramolecular Interactions, *European Polymer Journal* (2018), doi: <https://doi.org/10.1016/j.eurpolymj.2018.05.025>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Enhancing the Mechanical Properties and Self-Healing Efficiency of Hydroxyethyl
Cellulose-Based Conductive Hydrogels via Supramolecular Interactions**
