Hydrogel Wound Dressings for Bioactive Treatment of Acute and Chronic Wounds

Julia Koehler, Ferdinand P. Brandl, Achim M. Goepferich

PII: S0014-3057(17)31503-3
DOI: <https://doi.org/10.1016/j.eurpolymj.2017.12.046>
Reference: EPJ 8233

To appear in: *European Polymer Journal*

Received Date: 24 August 2017
Revised Date: 21 December 2017
Accepted Date: 31 December 2017

Please cite this article as: Koehler, J., Brandl, F.P., Goepferich, A.M., Hydrogel Wound Dressings for Bioactive Treatment of Acute and Chronic Wounds, *European Polymer Journal* (2017), doi: <https://doi.org/10.1016/j.eurpolymj.2017.12.046>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hydrogel Wound Dressings for Bioactive Treatment of Acute and Chronic Wounds

Julia Koehler, Ferdinand P. Brandl, and Achim M. Goepferich*

Department of Pharmaceutical Technology, University of Regensburg, Universitätsstr. 31,
93053 Regensburg, Germany

* Corresponding author. E-mail address: Achim.Goepferich@chemie.uni-regensburg.de

Keywords: alginate; antimicrobial agent; interpenetrating polymer network hydrogel; pH-modifying hydrogel; stem cell; wound dressing.
