Boronate affinity monolith via two-step atom transfer radical polymerization for specific capture of *cis*-diol-containing compounds

Qian Dong, Shuai-Shuai Chi, Xi-Yan Deng, Yao-Han Lan, Chao Peng, Lin-Yi Dong, Xian-Hua Wang

PII: S0014-3057(17)31703-2

DOI: <https://doi.org/10.1016/j.eurpolymj.2018.02.007>

Reference: EPJ 8281

To appear in: *European Polymer Journal*

Received Date: 24 September 2017

Revised Date: 5 February 2018

Accepted Date: 5 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Boronate affinity monolith via two-step atom transfer radical
polymerization for specific capture of *cis*-diol-containing compounds**
