Macromolecular nanotechnology

Supramolecular hydrogen-bonded polyolefin elastomer/modified graphene nanocomposites with near infrared responsive shape memory and healing properties

Muhammad Kashif, Young-Wook Chang

PII: S0014-3057(15)00082-8

DOI: <http://dx.doi.org/10.1016/j.eurpolymj.2015.02.007>

Reference: EPJ 6754

To appear in: *European Polymer Journal*

Received Date: 14 November 2014

Revised Date: 29 January 2015

Accepted Date: 5 February 2015

Please cite this article as: Kashif, M., Chang, Y-W., Supramolecular hydrogen-bonded polyolefin elastomer/modified graphene nanocomposites with near infrared responsive shape memory and healing properties, *European Polymer Journal* (2015), doi: <http://dx.doi.org/10.1016/j.eurpolymj.2015.02.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Supramolecular hydrogen-bonded polyolefin elastomer/modified graphene nanocomposites with near infrared responsive shape memory and healing properties

Muhammad Kashif, Young-Wook Chang*

Polymer Nano Materials Laboratory, Department of Chemical Engineering, Hanyang University,
Ansan, Gyeonggi 426-791, Republic of Korea
