This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Two chain-based Tb^{III}/Dy^{III} complexes derived from *m*-nitrobenzoic acid with totally different structures and magnetic properties

Teng-Fei Zheng, Xue-Mei Tian, Shu-Li Yao, Chen Cao, Jin-Bao Cai*, Sui-Jun Liu*

Two carboxylate-bridged Tb^{III}/Dy^{III} complexes with totally different chains have been obtained via similar hydrothermal reactions and complex **2** exhibits field-induced slow magnetic relaxation.
