New copper complexes with bipyrazolic ligand: Synthesis, characterization and evaluation of the antibacterial and catalytic properties

Tarik Harit, Houssam Abouloifa, Monique Tillard, Driss Eddike, Abdeslam Asehrou, Fouad Malek

PII: S0022-2860(18)30285-0

DOI: [10.1016/j.molstruc.2018.03.008](https://doi.org/10.1016/j.molstruc.2018.03.008)

Reference: MOLSTR 24947

To appear in: *Journal of Molecular Structure*

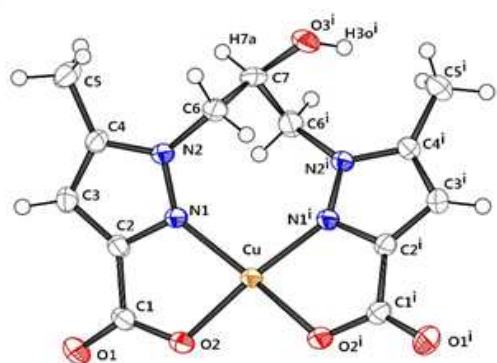

Received Date: 2 November 2017

Revised Date: 2 March 2018

Accepted Date: 2 March 2018

Malek, New copper complexes with bipyrazolic ligand: Synthesis, characterization and evaluation of the antibacterial and catalytic properties, *Journal of Molecular Structure* (2018), doi: 10.1016/j.molstruc.2018.03.008.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

No antibacterial activity

Good catalytic properties in the oxidation of catechol substrate.
