Effect of the type of metal on the electrical conductivity and thermal properties of metal complexes: The relation between ionic radius of metal complexes and electrical conductivity

ShM. Morgan, N.A. El-Ghamaz, M.A. Diab

PII: S0022-2860(18)30118-2

DOI: [10.1016/j.molstruc.2018.01.079](https://doi.org/10.1016/j.molstruc.2018.01.079)

Reference: MOLSTR 24801

To appear in: *Journal of Molecular Structure*

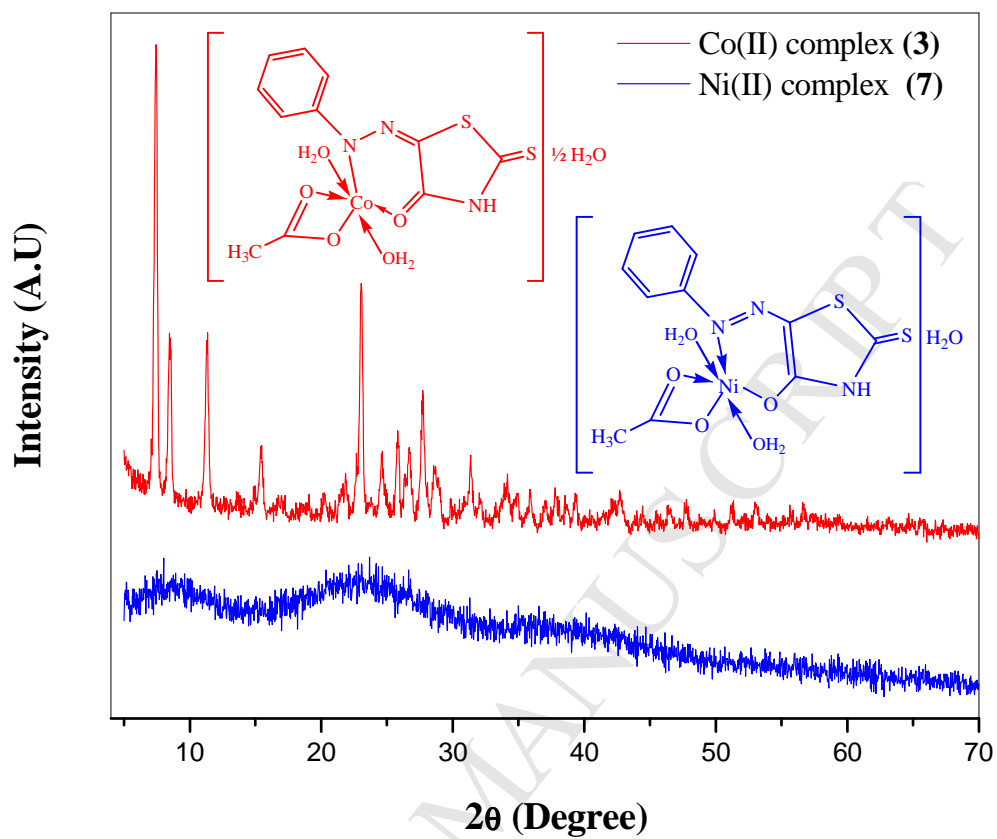

Received Date: 6 October 2017

Revised Date: 9 January 2018

Accepted Date: 29 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

X-Ray diffraction patterns of powder forms for Co(II) and Ni(II) complexes.
