Synthesis, characterization, antimicrobial and antitumor reactivity of new palladium(II) complexes with methionine and tryptophane coumarine derivatives

Danijela Lj Stojković, Verica V. Jevtić, Nenad Vuković, Milena Vukić, Petar Čanović, Milan M. Zarić, Milena M. Mišić, Dragče M. Radovanović, Dejan Baskić, Srećko R. Trifunović

PII: S0022-2860(17)31715-5

DOI: [10.1016/j.molstruc.2017.12.095](https://doi.org/10.1016/j.molstruc.2017.12.095)

Reference: MOLSTR 24714

To appear in: *Journal of Molecular Structure*

Received Date: 13 July 2017

Revised Date: 23 December 2017

Accepted Date: 26 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The all examined complexes, especially complex 3c significantly decreased viability of cancer cells, which implies that it might have an important role as promising anticancer agent.
