Factorial experimental design intended for the optimization of the alumina purification conditions

Mounaouer Brahmi, Mohamedou Ba, Yassine Hidri, Abdennaceur Hassen

PII: S0022-2860(17)31691-5

DOI: [10.1016/j.molstruc.2017.12.071](https://doi.org/10.1016/j.molstruc.2017.12.071)

Reference: MOLSTR 24690

To appear in: *Journal of Molecular Structure*

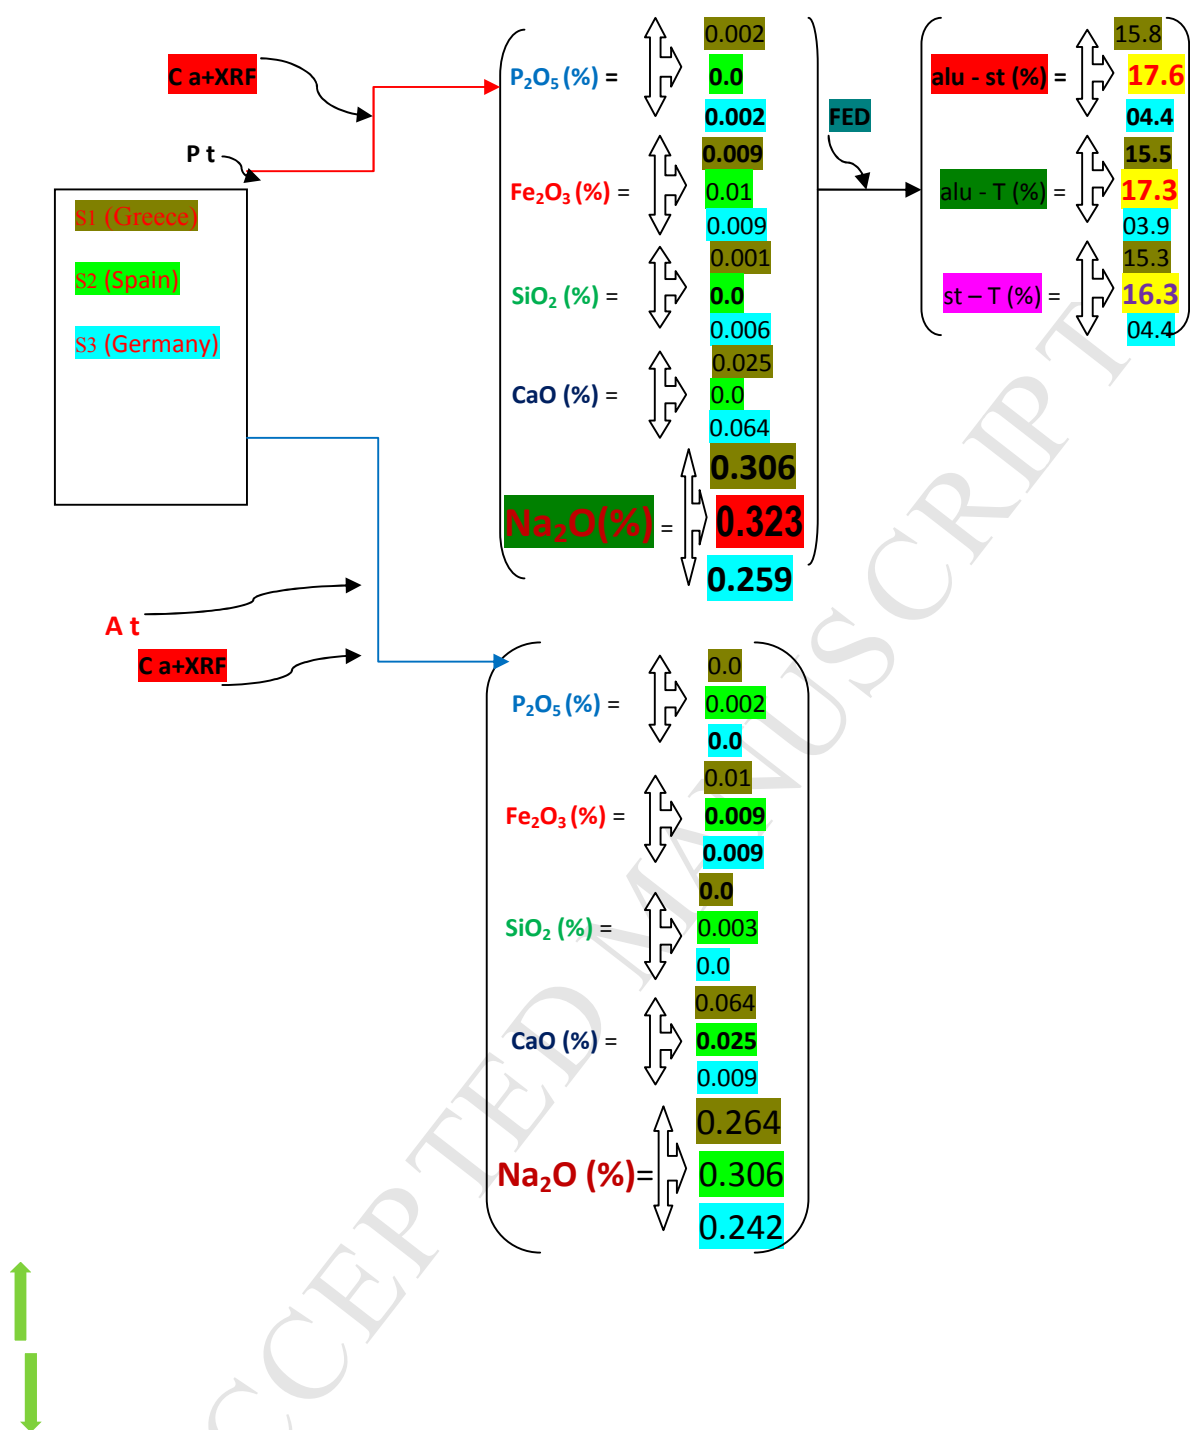

Received Date: 10 July 2017

Revised Date: 18 December 2017

Accepted Date: 19 December 2017

Please cite this article as: M. Brahmi, M. Ba, Y. Hidri, A. Hassen, Factorial experimental design intended for the optimization of the alumina purification conditions, *Journal of Molecular Structure* (2018), doi: 10.1016/j.molstruc.2017.12.071.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ca: Chemical analysis and X-ray fluorescence analysis (XRF); **Pt:** Prior treatment; **FED:** Optimization of the Alumina Purification Conditions by Factorial Experimental Design; **At:** After treatment; **alu - st:** quantity of alumina - stirring time; **alu - T:** quantity of alumina - temperature; **st - T:** stirring times - temperature
