Metal complexes of alkyl-aryl dithiocarbamates: Structural studies, anticancer potentials and applications as precursors for semiconductor nanocrystals

Fartisincha P. Andrew, Peter A. Ajibade

PII: S0022-2860(17)31465-5
DOI: 10.1016/j.molstruc.2017.10.106
Reference: MOLSTR 24477
To appear in: *Journal of Molecular Structure*
Received Date: 16 July 2017
Revised Date: 28 October 2017
Accepted Date: 29 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Metal Complexes of alkyl-aryl dithiocarbamates
- Structural and supramolecular motifs of dithiocarbamates complexes in the solid state
- Anticancer potentials of dithiocarbamates and their metal complexes
- Dithiocarbamates as precursors for semiconductor nanocrystals
