Glycine and metformin as new counter ions for mono and dinuclear vanadium(V)-dipicolinic acid complexes based on the insulin-enhancing anions: Synthesis, spectroscopic characterization and crystal structure

Fatemeh Ghasemi, Ali Reza Rezvani, Khaled Ghasemi, Claudia Graiff

PII: S0022-2860(17)31402-3

DOI: [10.1016/j.molstruc.2017.10.055](https://doi.org/10.1016/j.molstruc.2017.10.055)

Reference: MOLSTR 24426

To appear in: *Journal of Molecular Structure*

Received Date: 21 June 2017

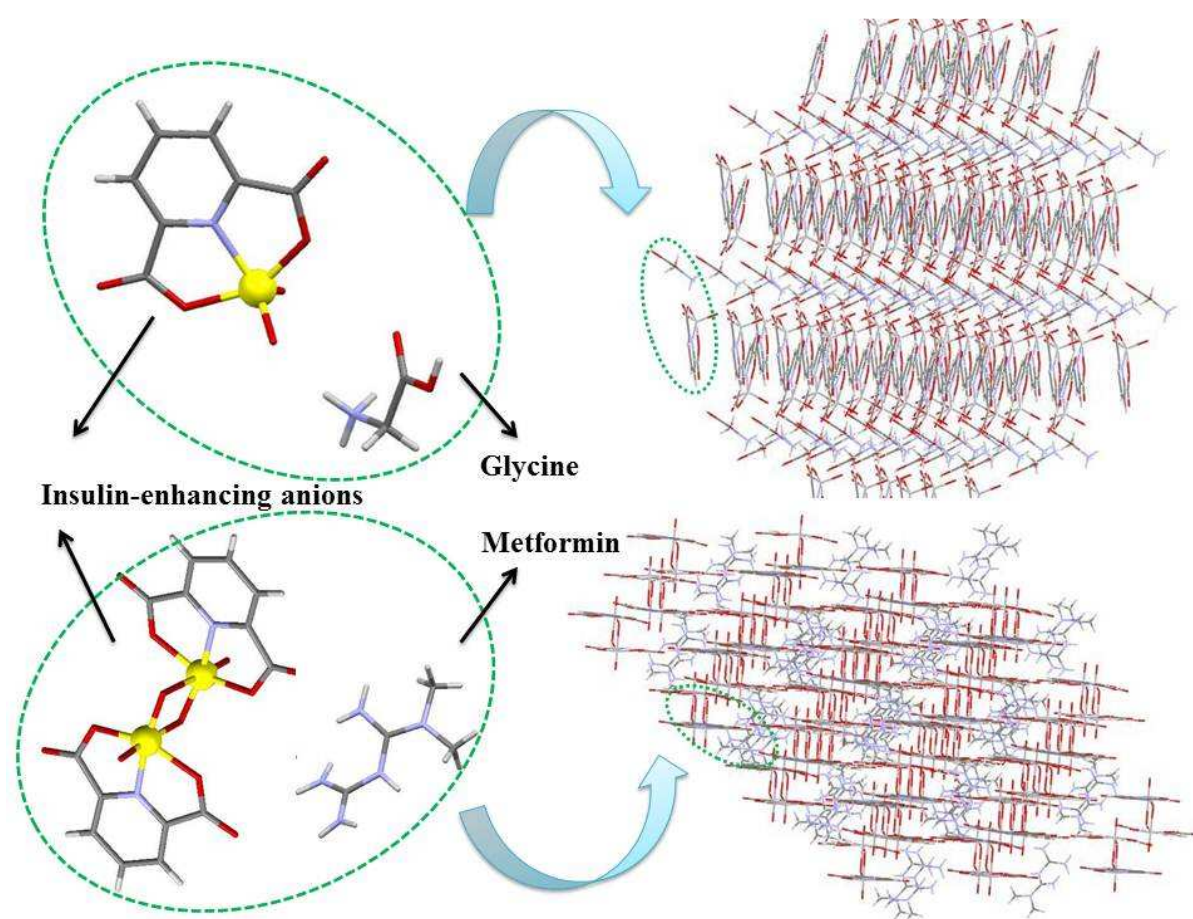

Revised Date: 12 October 2017

Accepted Date: 16 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
