Controlling the properties of radiation-synthesized thermoresponsive oligoether methacrylate hydrogels by varying the monomer side-chain length; self-composite network containing crystalline phase

Krzysztof Piechocki, Marcin Kozanecki, Sławomir Kadlubowski, Barbara Pacholczyk-Sienicka, Piotr Ulanski, Tadeusz Biela

PII: S0032-3861(18)30620-7

DOI: [10.1016/j.polymer.2018.07.025](https://doi.org/10.1016/j.polymer.2018.07.025)

Reference: JPOL 20744

To appear in: *Polymer*

Received Date: 28 March 2018

Revised Date: 27 June 2018

Accepted Date: 10 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
