New proton conducting membrane based on bacterial cellulose/polyaniline nanocomposite film impregnated with guanidinium-based ionic liquid

Sergiy Rogalsky, Jean-François Bardeau, Stanislav Makhno, Natalia Babkina, Oksana Tarasyuk, Tetiana Cherniavska, Iryna Orlovska, Natalia Kozyrovska, Olexander Brovko

PII: S0032-3861(18)30241-6

DOI: [10.1016/j.polymer.2018.03.032](https://doi.org/10.1016/j.polymer.2018.03.032)

Reference: JPOL 20445

To appear in: *Polymer*

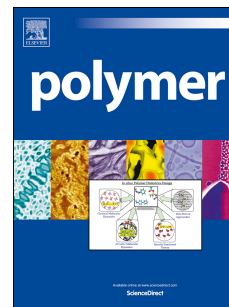

Received Date: 9 December 2017

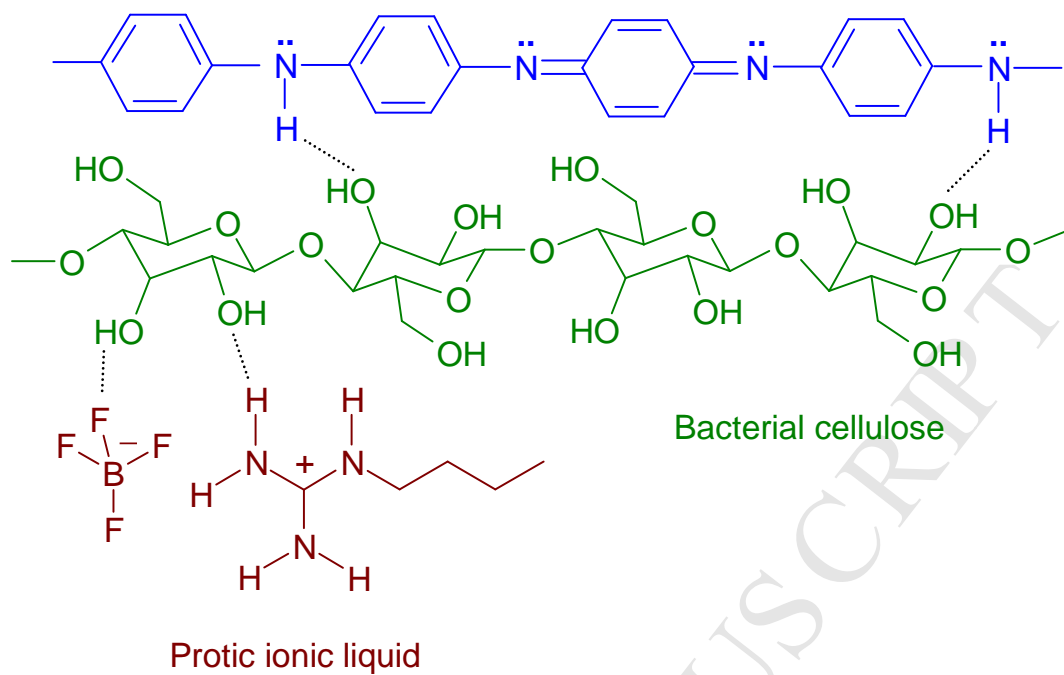

Revised Date: 14 March 2018

Accepted Date: 16 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
