Unexpected brittleness: Does the major component in binary polymer blends always make sense?

Jieqing Shen, Lijun Ye, Kangyuan Xie, Zhixiang Li, Qi Jiao, Zhenxian Chen, Yongjin Li

PII: S0032-3861(18)30244-1

DOI: [10.1016/j.polymer.2018.03.035](https://doi.org/10.1016/j.polymer.2018.03.035)

Reference: JPOL 20448

To appear in: *Polymer*

Received Date: 10 January 2018

Revised Date: 9 March 2018

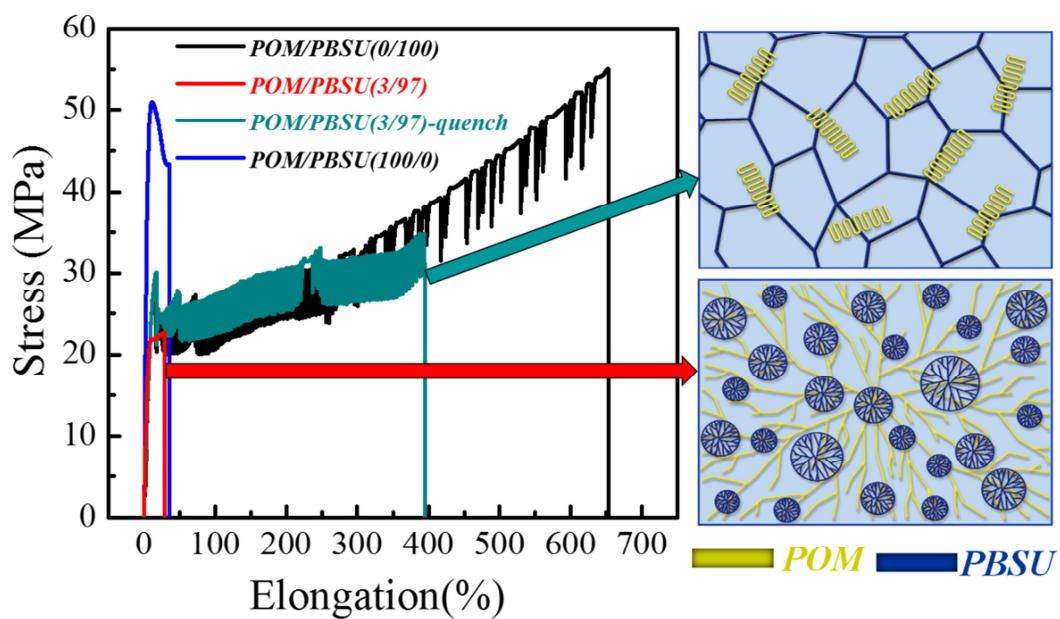

Accepted Date: 17 March 2018

Please cite this article as: Shen J, Ye L, Xie K, Li Z, Jiao Q, Chen Z, Li Y, Unexpected brittleness: Does the major component in binary polymer blends always make sense?, *Polymer* (2018), doi: 10.1016/j.polymer.2018.03.035.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Unexpected brittleness: Does the major component in binary polymer blends always make sense?
