A facile route for the preparation of proton exchange membranes using sulfonated side chain graphite oxides and crosslinked sodium alginate for fuel cell

Balappa Munavalli, Anand Torvi, Mahadevappa Kariduraganavar

PII: S0032-3861(18)30253-2

DOI: [10.1016/j.polymer.2018.03.044](https://doi.org/10.1016/j.polymer.2018.03.044)

Reference: JPOL 20457

To appear in: *Polymer*

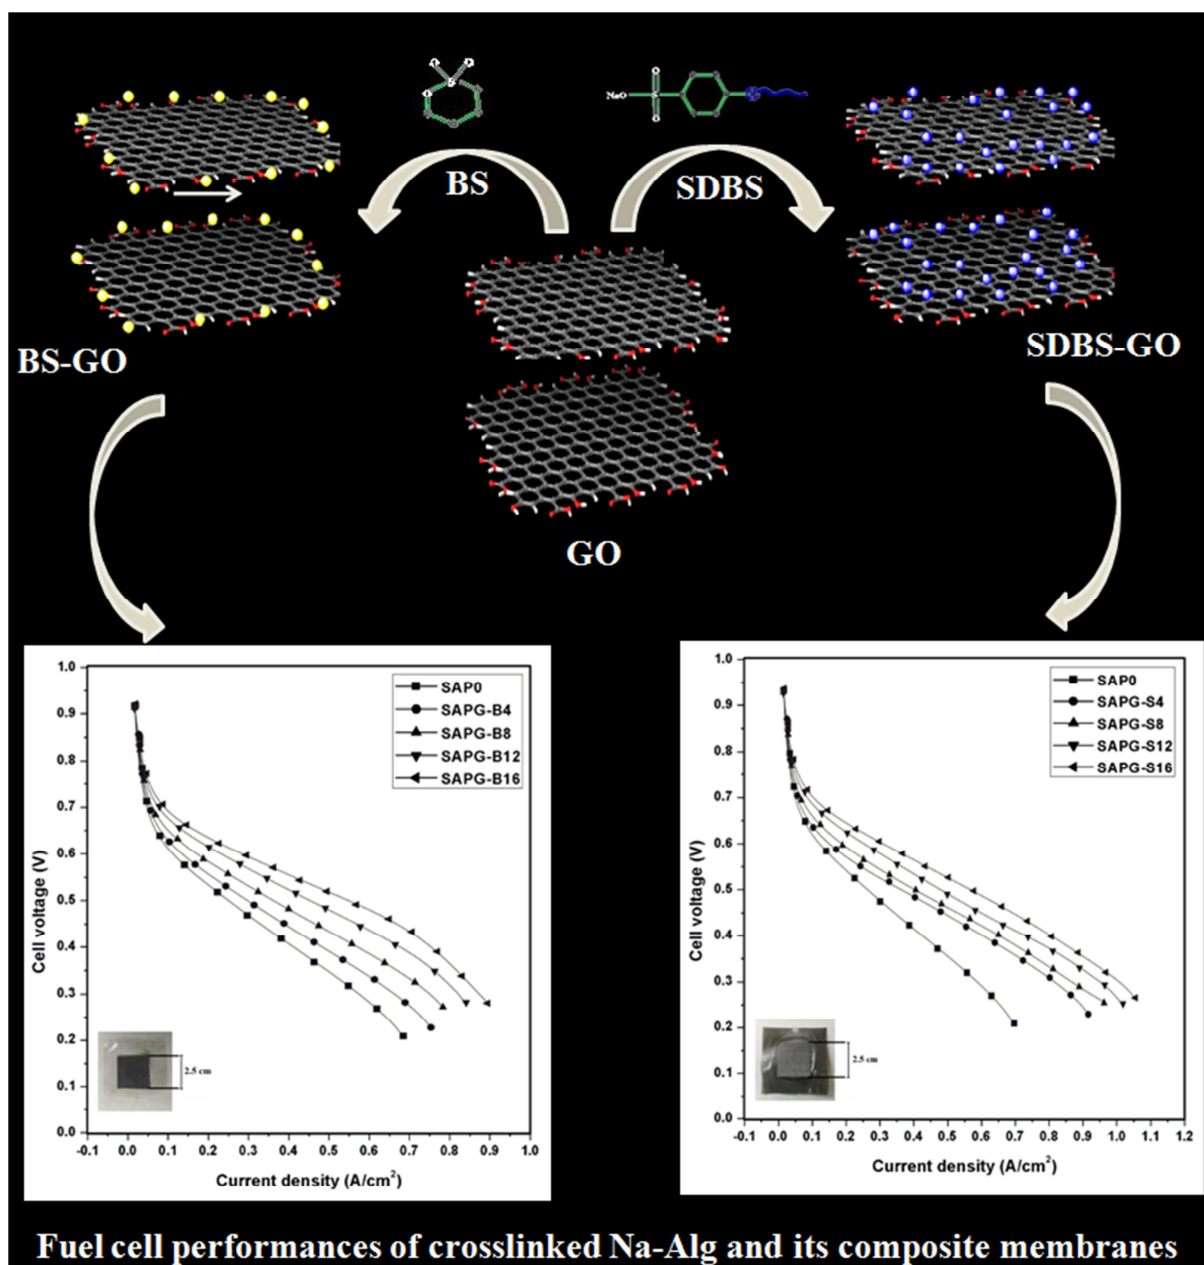

Received Date: 2 November 2017

Revised Date: 28 February 2018

Accepted Date: 21 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fuel cell performances of crosslinked Na-Alg and its composite membranes
