Fire resistant polyphenols based on chemical modification of bio-derived tannic acid

Zhiyu Xia, Weeradech Kiratitanavit, Patrick Facendola, Sammaiah Thota, Shiran Yu, Jayant Kumar, Ravi Mosurkal, Ramaswamy Nagarajan

PII: S0141-3910(18)30121-6

DOI: [10.1016/j.polymdegradstab.2018.04.020](https://doi.org/10.1016/j.polymdegradstab.2018.04.020)

Reference: PDST 8517

To appear in: *Polymer Degradation and Stability*

Received Date: 31 October 2017

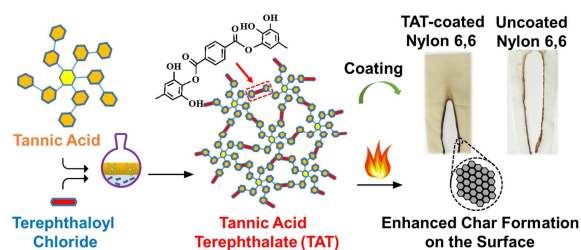

Revised Date: 4 April 2018

Accepted Date: 12 April 2018

Please cite this article as: Xia Z, Kiratitanavit W, Facendola P, Thota S, Yu S, Kumar J, Mosurkal R, Nagarajan R, Fire resistant polyphenols based on chemical modification of bio-derived tannic acid, *Polymer Degradation and Stability* (2018), doi: 10.1016/j.polymdegradstab.2018.04.020.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlight/Graphical abstract

Description: Bio-derived tannin compounds unveil a new sustainable route to environment-friendly flame retardant solutions with one-step chemical modification.
