Effect of water content on the thermal degradation of amorphous polyamide 6,6: A collective variable-driven hyperdynamics study

Behrouz Arash, Barend J. Thijsse, Alessandro Pecenko, Angelo Simone

PII: S0141-3910(17)30336-1

DOI: [10.1016/j.polyimdegradstab.2017.10.019](https://doi.org/10.1016/j.polyimdegradstab.2017.10.019)

Reference: PDST 8386

To appear in: *Polymer Degradation and Stability*

Received Date: 14 August 2017

Revised Date: 29 September 2017

Accepted Date: 30 October 2017

Please cite this article as: Arash B, Thijsse BJ, Pecenko A, Simone A, Effect of water content on the thermal degradation of amorphous polyamide 6,6: A collective variable-driven hyperdynamics study, *Polymer Degradation and Stability* (2017), doi: 10.1016/j.polyimdegradstab.2017.10.019.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Degradation in the backbone of the polymer chains
