Friction-induced surface textures of liquid crystalline polymer evaluated by atomic force microscopy, spectroscopy and nanoindentation

Fanglin Xu, Yuanshi Xin, Tongsheng Li

PII: S0142-9418(17)31771-3

DOI: [10.1016/j.polymertesting.2018.03.041](https://doi.org/10.1016/j.polymertesting.2018.03.041)

Reference: POTE 5393

To appear in: *Polymer Testing*

Received Date: 2 December 2017

Revised Date: 12 March 2018

Accepted Date: 23 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Friction-induced surface textures of liquid crystalline
polymer evaluated by atomic force microscopy, spectroscopy and
nanoindentation**
