Phase morphology, fracture toughness and failure mechanisms in super-toughened PLA/PB-g-SAN/PMMA ternary blends: A Quantitative analysis of crack resistance

Majid Mehrabi Mazidi, Reyhaneh Berahman, Arman Edalat

PII: S0142-9418(18)30244-7

DOI: [10.1016/j.polymertesting.2018.03.028](https://doi.org/10.1016/j.polymertesting.2018.03.028)

Reference: POTE 5380

To appear in: *Polymer Testing*

Received Date: 9 February 2018

Accepted Date: 13 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Material Behaviour

**Phase Morphology, Fracture Toughness and Failure Mechanisms in Super-Toughened PLA/PB-g-SAN/PMMA Ternary Blends: A Quantitative Analysis of Crack Resistance**
