Birnessite manganese oxide nanosheets assembled on Ni foam as high-performance pseudocapacitor electrodes: Electrochemical oxidation driven porous honeycomb architecture formation

Cuiyin Liu, Yanfeng Chen, Weixin Huang, Yue Situ, Hong Huang

PII: S0169-4332(18)31810-5  
DOI: <https://doi.org/10.1016/j.apsusc.2018.06.243>  
Reference: APSUSC 39751

To appear in: *Applied Surface Science*

Received Date: 4 April 2018  
Revised Date: 25 June 2018  
Accepted Date: 26 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Birnessite manganese oxide nanosheets assembled on Ni  
foam as high-performance pseudocapacitor electrodes:  
Electrochemical oxidation driven porous honeycomb  
architecture formation**
