Low-temperature direct synthesis of high quality WS₂ thin films by plasma-enhanced atomic layer deposition for energy related applications

Seungmin Yeo, Dip K. Nandi, R. Rahul, Tae Hyun Kim, Bonggeun Shong, Yujin Jang, Jong-Seong Bae, Jeong Woo Han, Soo-Hyun Kim, Hyungjun Kim

PII: S0169-4332(18)32107-X
DOI: <https://doi.org/10.1016/j.apsusc.2018.07.210>
Reference: APSUSC 40025

To appear in: *Applied Surface Science*

Received Date: 5 July 2018
Accepted Date: 29 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
