Influence of Plasma Functionalization Treatment and Gold Nanoparticles on Surface Chemistry and Wettability of Reactive-Sputtered TiO₂ Thin Films

A. Achour, M. Islam, S. Solaymani, S. Vizireanu, Khalid Saeed, G. Dinescu

PII: S0169-4332(18)32041-5
DOI: <https://doi.org/10.1016/j.apsusc.2018.07.145>
Reference: APSUSC 39960

To appear in: *Applied Surface Science*

Received Date: 15 January 2018
Revised Date: 13 July 2018
Accepted Date: 21 July 2018

Please cite this article as: A. Achour, M. Islam, S. Solaymani, S. Vizireanu, K. Saeed, G. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
