To appear in: *Applied Surface Science*

Received Date: 2 March 2018
Revised Date: 10 June 2018
Accepted Date: 9 July 2018

Please cite this article as: J. Yang, Y. Liang, K. Li, G. Yang, Y. Zhu, S. Liu, W. Lei, New Reaction Pathway Induced by the Synergistic Effects of Bi Plasmon and La³⁺ Doping for Efficient Visible Light Photocatalytic Reaction on BiOCl, *Applied Surface Science* (2018), doi: <https://doi.org/10.1016/j.apsusc.2018.07.051>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**New Reaction Pathway Induced by the Synergistic Effects of Bi
Plasmon and La³⁺ Doping for Efficient Visible Light Photocatalytic
Reaction on BiOCl**
