Full Length Article

Hydrothermal synthesis, morphology, magnetic properties and self-assembly of hierarchical α -Fe₂O₃ (hematite) mushroom-, cube- and sphere-like superstructures

Djordje Trpkov, Matjaž Panjan, Lazar Kopanja, Marin Tadić

PII: S0169-4332(18)31787-2
DOI: <https://doi.org/10.1016/j.apsusc.2018.06.224>
Reference: APSUSC 39732

To appear in: *Applied Surface Science*

Received Date: 12 December 2017
Revised Date: 14 May 2018
Accepted Date: 24 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
