Full Length Article

Ultra-thin MoS<sub>2</sub> Shell deposited on Ag Nanowires for tuning Surface-enhanced Raman Spectroscopy

Shen-wei Bai, Hui Mei, Lai-fei Cheng

PII: S0169-4332(18)31380-1  
DOI: <https://doi.org/10.1016/j.apsusc.2018.05.080>  
Reference: APSUSC 39356

To appear in: *Applied Surface Science*

Received Date: 8 April 2018

Accepted Date: 11 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Ultra-thin MoS<sub>2</sub> Shell deposited on Ag Nanowires for tuning Surface-enhanced Raman Spectroscopy
