Title: Investigations of visible light driven Sn and Cu doped ZnO hybrid nanoparticles for photocatalytic performance and antibacterial activity

Authors: Shanmugam Vignesh, Jeyaperumal Kalyana Sundar

PII: S0169-4332(17)33456-6
DOI: <https://doi.org/10.1016/j.apsusc.2017.11.167>
Reference: APSUSC 37749

To appear in: *APSUSC*

Received date: 26-9-2017
Revised date: 14-11-2017
Accepted date: 20-11-2017

Please cite this article as: Shanmugam V, Jeyaperumal KS, Investigations of visible light driven Sn and Cu doped ZnO hybrid nanoparticles for photocatalytic performance and antibacterial activity, *Applied Surface Science* (2010), <https://doi.org/10.1016/j.apsusc.2017.11.167>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Investigations of visible light driven Sn and Cu doped ZnO hybrid nanoparticles for photocatalytic performance and antibacterial activity

Shanmugam Vignesh^a and Jeyaperumal Kalyana Sundar^{a,*}
